

The awning arms contain tensioned cables. Always use caution, securely tie the awnings arms to the awning when performing installation, adjustments, or repairs. Sudden movement of tension arms can result in serious personal injury, product and/or property damage.

Use a dry silicone spray lubricant or lithium grease spray on the axle of the roller tube, the ends of the roller tube, and on the sides opposite to the motor gear. (see illustration below)

Take precaution and be sure to avoid spraying lubricant onto the canvas as they can \*stain.

Lubricant application is normally not needed more than once a year. If, however, the mechanism develops a squeak, it's just a sign that the lubricant is worn away and additional lubricant should be applied.

**Recommended Lubricant Products:** WD-40 Specialist Protective White Lithium Grease Spray with Focus Nozzle.

\* In case lubricant does get on the fabric; immediately treat the area by gently rubbing mild soap and water with a damp sponge, rinsing soap solution off with a water filled spray bottle, allow the fabric to dry before closing.
