

- ① Open the awning to about 1/2 projection.
- ② With a helper supporting the front bar, loosen the Screw A to 1/2 turn.
Do not loosen or remove the Screw A completely.
- ③ Adjust the Screw B to raise or lower the front bar.
 - a. Turn Screw B to the right (clockwise) to raise the front bar.
 - b. Turn Screw B to the left (counter clockwise) to lower the front bar.
- ④ Make sure the front bar is level.
- ⑤ Tighten the Screw A.
- ⑥ Repeat for the other arm.
